

# BIODIESEL FUEL

RECYCLE COOKING OIL & POWER ST. JOHNS COUNTY VEHICLES – GREASE IS THE WORD!

## You Can Help Our Environment & Economy

The County Biodiesel Program, Solid Waste and Utility Pretreatment Departments ask for **your help** in recycling used cooking grease to convert into environmentally friendly fuel.

Biodiesel fuel is biodegradable, safer for the environment than other fuels, and costs less to make.

Grease poured down the drain clogs pipes and causes sewer overflows. It also makes its way into our waterways and pollutes our water.

## Bring Used Cooking Grease to These Collection Points:

### **Biodiesel Fuel Department**

2730 Industry Center Rd.  
(904) 209-0291

### **Tillman Ridge Landfill**

3005 Allen Nease Rd.  
(904) 827-6980

### **Stratton Road Transfer Station**

250 North Stratton Rd.  
(904) 827-6980

### **Anastasia Island Wastewater Treatment Plant**

860 West 16th St.  
(904) 209-2700

### **SJC Solid Waste Community Collection Events**

(904) 827-6980

- ✓ Please be aware that your container will not be returned.
- ✓ Allow used cooking grease to cool and store it in a safe container that will not melt or shatter.
- ✓ Bring it to a collection point to be recycled into biodiesel fuel. Do not put it in a curbside bin.
